Cyberspace transactions present interesting international, state and local tax issues

Levey, Marc M; O'Donnell, Thomas A; Powers, J Pat
Tax Executive v49 n6 pp: 476-486 Nov/Dec 1997

ISSN: 0040-0025 Journal Code: TXE

Document Type: Journal article

Language: English **Special Feature:** References **CODEN:** DCAC

Word Count: 9787 **Line Count:** 890

Abstract:

The myriad transactions that can be effected through the Internet give rise to a host international tax issues that must be addressed to determine which jurisdictions may tax the transaction, and what rules will govern the determination of the amount of tax. It electronic becomes a significant portion of global commerce, it will place pressure on the previously developed international consensus on taxation of international transactions and investments. Traditional understanding of how income should be sourced are less satisfying in the electronic marketplace.

Why long-term funding is unattractive

Cornwall, Shira

Corporate Finance n141 pp: 12-15 Aug 1996

ISSN: 0958-2053 Journal Code: COF

Document Type: Journal article

Language: English Special Feature: Charts Graphs CODEN: DCAC

Word Count: 2735 Line Count: 249

Abstract:

The UK corporate sector has an increasing requirement for external finance, and the UK government has a significant borrowing requirement. The government is likely to keep real long-term rates high and threatens to crowd out the corporate sector in the capital markets. At the same time, it renders long-term borrowing significantly less attractive than short-term borrowing. The UK government's borrowing spree may crowd out industrial companies from the sterling bond market. While the UK public sector borrowing requirement is falling, it is not falling fast enough. The slope in the sterling yield curve is the real deterrent to locking in to long-term money and the corporate sector threatens to be crowded out by gilt issuance.

Integrating desktop GIS into the real estate market analysis: A primer and comparison of available options

Cannon, Susanne Ethridge

Real Estate Finance v13 n1 pp: 21-37 Spring 1996

ISSN: 0748-318X Journal Code: RFN

Document Type: Journal article

Language: English Special Feature: Maps Charts Graphs References

CODEN: DCAC

Word Count: 6254 Line Count: 569

Abstract:

Geographic Information Systems (GIS) automate the process of overlaying maps and permit geographic analysis of data across and between those geographically parallel layers. Desktop GIS has found its way into the offices of real estate brokers, developers, investors, and appraisers. The focus of the GIS software is generally on making maps, but the rules of data analysis still apply. The user should: 1. Look at the data. 2. Calculate summary statistics. 3. Aggregate the data. 4. Graph it. 5. Map it. Five GIS programs are described: 1. ESRI's ArcView2, 2. Strategic Mapping Inc.'s Atlas GIS, 3. MapInfo Corp.'s MapInfo, 4. Caliper Corp.'s Mapitude, and 5. ScanUS' ScanUS.

...on the requirements of real estate market analysis. Exhibit 2 outlines the process that market analysts engage in. Preliminary ...true if there is some customary cutoff point used in analysis. For example, real estate analysts typically use vacancy rates below 5% to indicate a supply constrained market. Analysts using GIS will want to select ranges that acknowledge the custom. Some software makes this...

...aid in designating appropriate class intervals; MapInfo has a simple bar-chart capability and Arc View has a histogram feature; ScanUS has made an attempt at aiding in preliminary data analysis with a sort of moveable histogram slide bar (called a strata manager) that permits the analyst to identify outliers and to get at the shape of the distribution by iteration. Unfortunately...

...who remembers sophomore statistics and the basic rules of data description and preliminary data analysis. 4
Statistical Analysis and Comparison

The real analysis part of market analysis begins by identifying the...

...complementary type. These three concepts form the traditional theoretic rationale for urbanization.5

Accordingly, market analysts who subscribe to these as explanations of urbanization must devise a methodology to consider how...

...in the region's basic export industries.

$S = m \cdot B - B$

or

$S = B \cdot (m - 1)$

With all its inherent flaws (the underlying assumption, for example, that ...quotient.

$LQ = \% \text{ local employment in industry } i /$

$\% \text{ national employment in industry } i \text{ (Formula Omitted)}$
 $(LQ - 1) / LQ \cdot T = B$

If a city has a location quotient of 3 for some industry...

...for this sector can be extended to make comparisons across time and across regions.

Market analysts use these relationships to project future employment demand within certain industries and the resulting population...

...employment (a rough proxy for office employment) for all MSAs with location quotients greater than 1.5, as well as large percentage increases in office building rents from 1993 to 1994...they do one or two things best. A capsule summary of the previous exhibit follows.

Brokers, local mortgage market analysts, and many appraisal firms will be content with a simple display of their own geocoded...

...Census variables, while Mapitude has a subset of them) brings its actual price to approximately \$1,200. At that price it remains \$800 less expensive and considerably easier to learn. Its principal drawbacks for real estate analysts are a failure to report the number of observations in each class of a thematic...
...graphing or other technique to look at the data before mapping it.

First Street, at \$1,995, is the bundled version of Arc View, which includes a geocoder and a scripting...

...analyses with ease.

(Table Omitted)

(Table Omitted)

(Table Omitted)

(Table Omitted)

(Table Omitted)

Real estate analysts who want to share files and data with corporate clients may find that selecting MapInfo...

...or customized or mapped. They have developed an intriguing list of customers, including many retail analysts, church groups, and real estate developers. Institutional investors making regional and intraregional comparisons and working...for presentation. Purchasing the SMI data avoids much of the construction process outlined in Exhibit 1, although that makes for the most expensive package.

Conclusion

The buzz in real estate circles...

...may well be the perfect business GIS. But waiting for that day puts real estate analysts at a severe disadvantage.

Major retailers and Fortune 500 firms have already committed to GIS...

...that will make an easier transition to the perfect GIS of the future.

The complexity and legitimacy of corporate law

Orts, Eric W

Washington & Lee Law Review v50 n4 pp: 1565-1623 Fall 1993

ISSN: 0043-0463 Journal Code: AWLL

Document Type: Journal article

Language: English Special Feature: References CODEN: DCAC

Word Count: 30596 Line Count: 2,781

Abstract:

A theory of corporate law is presented to combat simplistic models that have become influential. This theory provides a realistic and workable alternative that takes account of the complexity in corporate law. Corporate law is complex because it embodies a set of conflicting normative principles. The normative complexity of corporate law explains, at least

in part, its technical complexity. Corporate law retains legitimacy to the extent that it continues to be created and maintained through sound processes of law-making and law-applying. The technical and normative complexity of corporate law is legitimate in accordance with the quality of the deliberative procedures of democratic government and judicial administration.

Regulation of Accountancy and Accountants: A Comparative Analysis of Accounting for Research and Development in Four Advanced Capitalist Countries

Willmott, Hugh C.; Puxty, Anthony G.; Cooper, David J.; Lowe, E. Anthony; Robson, Keith

Accounting Auditing & Accountability Journal v5 n2 pp: 32-56 1992

ISSN: 0951-3574 **Journal Code:** AAJ

Document Type: Journal article

Language: English **Special Feature:** Charts References **CODEN:** DCAC

Word Count: 11985 **Line Count:** 1,090

Abstract:

The contrasting processes and institutional arrangements through which the development of regulatory structures governing accounting practices within the US, the UK, Germany, and Sweden has been accomplished are examined. The specific accounting issue considered is the disclosure and treatment of research and development (R&D) expenditure in corporate financial statements. The neo-capitalist categories of hierarchical control, dispersed competition, and spontaneous solidarity are used to illuminate how the processes and institutional structures of accounting regulation are shaped by and in turn serve to strengthen or undermine the disciplinary effects of these 3 organizing principles. Each of the 4 countries has a different structural complex of institutional arrangements within which to regulate accounting, accounts, and accountants. These differences reflect differences of culture, history, sociopolitical structure, and patterns of supranational influence. Some 15 years ago, only the US required disclosure of R&D amounts. Since then, Sweden and the UK have followed in effectively mandating disclosure.

Supplier Number: Text:

...here is the disclosure and treatment of research and development expenditure in corporate financial statements(1). There are two aspects of the treatment of research and development (R&D) expenditure in... sectoral organizations and the interests of the state as an institution" (p. 40). Echoing this view , Cawson has stressed the importance of appreciating how "interests are organised within a framework of opportunities" (Cawson, 1985, p. 4). We argue that neo-corporatist analysis has generated a number of valuable analytical categories which... three organizing principles supplied by Streeck and Schmitter (1985). These definitions are clarified in Figure 1 . (Figure 1 omitted)

THE UNITED KINGDOM

THE REGULATORY CONTEXT

In nineteenth century Britain, there was considerable reliance...

...by the constituent bodies, to have greater force than the discredited "Recommendations". It lasted until 1 August 1990, under the revised title of the Accounting Standards Committee (ASC), since which time...from industrial interests and 37 from other parties (principally academe, the accountancy profession, and stock analysts). One of the main issues at stake seems to have been the importance of R&D information for financial analysts and the stock market (Bierman and Dukes, 1975). Of the non-industrial responses none objected...

...of accounting procedure which again would affect company profits on government contracts (a figure of \$ 1.4 billion was mentioned). This concerned the amount of general and administrative overhead which could... of the four countries as a process of (national) interest-group negotiation with an international overlay, it may be more appropriate to view each national situation as a medium as well...

...of further convergence of the institutional arrangements for accounting regulation within advanced capitalist societies.

NOTES

1. Throughout this article we treat research and development expenditure as it is defined by the...tacit understandings and social attitudes can significantly influence the way these arrangements operate in practice. 4. Two caveats are in order however. First, the 1856 Act did include a model set...

...the requirement of the Companies Acts that financial reports must show a "true and fair view" (which has never been defined in statute) and in the USA in the requirement that...position, and even after that, no state registration as such is required. 24. As from 1 July 1989, a new body, the Redovisningsnämnden, was set up to bring together the state...Market: An Evaluation of the Securities Act of 1934", American Economic Review, Vol. 63 No. 1, pp. 132-55. Will the RBOCs Turn DSL Into Another ISDN?(Industry Trend or Event)

Flanagan, Patrick

Telecommunications , 33 , 5 , 37

May , 1999

ISSN: 0278-4831

Language: English **Record Type:** Fulltext; Abstract

Word Count: 2083 **Line Count:** 00170

Abstract: ...will be treated as ISDN was, as the two technologies have several similarities. The RBOCs view cable modems as their primary threat, as by 2002 there are expected to be 4.3 million cable modems, as opposed to only 2.7 million DSL customers.

Abstract:

...available is anyone's guess, but deployment is simpler than ISDN because ADSL runs on overlay networks; therefore, the RBOCs don't have to integrate or upgrade existing switches or deploy...

...set by the cable modem industry and has no bearing on actual costs. To reach 1.5 Mbps downstream, the cost is \$60 to \$100 per month. A primary reason for...

...shows few were buying. Total users went from just under one million to less than 1.4 million.

The Opportunity Window

The RBOCs have a limited window of opportunity. Most view...

...end of 1999 or cable will take a commanding lead," said Claudia Bacco, senior DSL analyst for TeleChoice.

According to The Yankee Group, DSL consumer pricing cannot exceed \$40 a month...

...This is where cable modems are priced with their apparently faster downstream data rates of 1.5 Mbps (however, users are on a party line that degrades service as their neighbors...

...device cost, must come down to \$100 to \$150," said Jim Wahl, a Yankee Group analyst. The hardware costs will reach this level by the second half of 1999.

The CLECs...with a \$5.82-billion bankroll. AT&T owns 40 percent of @Home. Microsoft's \$1-billion investment in Comcast is well known, and both it and Compaq are investors in...

CodeBasic 5.1 Sequiter Software Inc., Newmarket, NH 403-437-2410
Gives Visual Basic for Windows and DOS...fast Zmodem functions; and CA-Clipper 5.0 and Summer '87 source code. Supports all overlay linkers, high-speed modems, 115200 baud, 16550A chip, non-standard com ports, and third-party libraries...

...and security options. Includes CA-Clipper 5.0 and Summer '87 source code. Supports all overlay linkers, high-speed modems, 115200 baud, 16550A chip, and nonstandard com ports. Free demo can...for modification of jobs in the Novell print queue. No royalties. \$299.

NetLib for FoxPro 1.0 Pinnacle Publishing Inc., Kent, WA
206-251-1900; 800-788-1900
A complete networking...

...information. Includes 11 functions for controlling Novell's print capturing. No royalties. \$299.

NOVLIB 2.1 Blink Inc., Richmond, VA 804-747-6700
A dynamically overlayable Novell network function library for...OS/2, OSF/Motif, and Open Look. \$1950-\$6300. Reader service #862.

XVT PowerObjects Pak 1 XVT Software Inc., Boulder, CO 303-443-4223;
800-678-7988

Portable custom controls objects...elements. Accesses an unlimited number of dBASE, R:Base, Paradox, CA-Clipper, FoxBase/FoxPro, Lotus 1-2-3, SuperCalc, Excel, memo and note fields, DIF, ASCII, word processors, and graphics files...bordered and/or filled) with 24 different icons and unlimited line and bar variations. Type 1 fonts can be downloaded from within an application, ensuring that the printer has all the...

...for Microsoft's Visual Basic Data Manager control. Optimized for Btrieve access to provide 10:1 speed improvement at just 10 percent of the resource usage. SQL queries are mapped to...

...dynamic, runtime constraints without programming. Exports data to other desktop tools such as Excel, Lotus 1-2-3, FrameMaker, and DataPivot, and takes full advantage of Macintosh System 7 and Windows 3.1 for dynamic data exchange. Supports most major relational databases, including AS/400, DAL, DB2, Informix...

...of SQL and OBE to do ad hoc queries and report writing against Xbase and 1-2-3-files. Using the menu-design facility and dBASE programming constructs, developers can also...users with answer sets formatted for the Windows clipboard, and other popular Windows applications, including 1-2-3, Excel, Word for Windows, and WordPerfect. A Macintosh version is planned for 1994. EDA/Link 2.1 communications software is required for EDA session support. \$199 (\$239 with EDA/Link 2.1). Volume discounts

available.

FindOut! Open Data Corp., Lexington, MA 617-860-8300
A client/server...

...dictionary builder, database mapper, dynamic forms, and reports designer. The information end-user component, FindOut! Analyst, provides an easy method for launching complex queries, asking ad hoc and follow-up questions...

...access toolbars, fast data selector tool, a forms and reports designer, and integration with Lotus 1-2-3, Excel, and other desktop software. Supports Sybase SQL Server 1.7, or 4.2 or later; IBM Database Manager OS/2 1.3 or later; Oracle 6 or later; IBM DB2 2.3 or later; and IBM SQL/DS 3.3. FindOut! Builder: \$995. FindOut! Analyst: \$4995.
Freeform 7.4 Dimension Software Systems, Las Colinas, TX 214-580-1045
A menu...

...mainframes, midrange servers, or desktop systems, into formatted desktop reports or other applications, including Lotus 1-2-3, Microsoft Excel, and most word processors. Data sources include DB2, IMS, VSAM, Informix...

...Wave connected to HP 3000 and HP 9000 servers. \$495-\$750 per user.
Iconic Query 1.3 IntelligenceWare, Los Angeles, CA 310-216-6177;
800-888-2996
Uses icons and its...an interface for automatically reformatting host-based data to 10 PC file formats, including Lotus 1-2-3, Excel, WordPerfect, Btrieve, and Word for Windows. \$500-\$42,000.
KnowledgeSeeker Angoss Software...

...from other Windows applications, such as Microsoft Word and Excel, WordPerfect for Windows, and Lotus 1-2-3 through menu options. Users can also copy the results of a query to...

...Sybase and Microsoft SQL Server, dBASE, and Paradox. Runs under Windows. \$395 (\$99 through 6/1/94).
Oracle Browser Oracle Corp., Redwood Shores, CA 415-506-7000;
800-633-0583

A...tabs, pie charts, and bar graphs. Lets IS deliver prepackaged business data to managers and analysts, without the need to custom-program individual user features. A multidimensional drill-down structure is...

...used to filter records in a report or to find any record. \$149.
quest 2.1 Gupta Corp., Menlo Park, CA 415-321-9500; 800-876-3267
An end-user data...data. The data-conversion component lets users convert data to decision-support tools including Lotus 1-2-3, Excel, WordPerfect, the RS Series, and the SAS System. Does not require data...

...options. Reporting can be done from CodeReporter, a CodeReporter launch utility, or a CodeBase 5.1 application. Uses the Bit Optimization technology of CodeBase 5.1, allowing querying of a 500,000-record data file in one second. \$195.

Crystal Reports...over the layout of information is provided through centering, justification, and wrapping in columns.

FlexQL 1.1 Data Access Corp., Miami, FL 305-238-0012;
800-451-3539

Survey of expert critiquing systems: practical and theoretical frontiers.
(programs that critique human experts)(Computing Practices) (Technical)

Silverman, Barry G.

Communications of the ACM , v35 , n4 , p106(22)

April, 1992

Document Type: Technical

ISSN: 0001-0782

Language: ENGLISH **Record Type:** FULLTEXT; ABSTRACT

Word Count: 16383 **Line Count:** 01310

...in electronic work environments occurs when one is attempting to complete specific tasks. As Figure 1 shows, the user initiates a task using some task-support software (e.g., an expert... word processor). For a given task, the human's input to this environment consist of: (1) the problem description (e.g., patient's symptoms, design requirements, or type of document to...it fails any of the four tests that follow. These also appear in Figure 2.

(1) Clarity Tests -- A clear statement is unambiguous. It has one meaning. For instance, a generalization...

...Validation equates to correspondence. Validation means that knowledge passes the tests of correspondence or experience.

(4) Workability Testing--Perfect descriptive knowledge is infinitely costly. The body of knowledge must stop short...

...One verifies and validates a body of knowledge pragmatically. It requires a mutual exchange of view -points and a two-way communication between the expert human and the expert critic. This...

...of Five Categories of

Critiquing System Usage

This section will discuss five sets of critics:

- (1) the early influential prototypes, commercialized critics in
- (2) word processing and
- (3) engineering design,
- (4...

...of the first three sets of critics of this survey may be found in Table 1 . It plots the systems surveyed as the rows of the table and the alternative ways...it exclusively offers the features one requires in the critiquing process. As delineated in Table 1 , E-ATTENDING includes a differential analyzer and a dialog generator but it does not have...

...risk analysis, and when to critique by global plan analysis. Critiquing by reacting occurs where:

- (1) specific rules can be written for each type of wrong answer,
- (2) the rules for...

...or knowledge base of rules. This is how most grammar critics currently work.

If conditions (1) through (3) deteriorate and the domain has numerous feasible solutions and primarily subjective standards from...

...of acceptable solution sets. This, Mille calls critiquing by local risk analysis. Finally, if condition (4) does not hold for a given domain, then critiquing cannot simply address an isolated portion of the proposed solution (e.g., each subdecision in isolation), but must adopt a global view to examine the totality of what the user is suggesting. This is called critiquing by...s Contributions: A Theory of Expert Errors and Critiquing. While the purpose of Section 3. 1 is to describe five early and influential prototypes, COPE as it exists today is both...critics yet built (TIME, in [23] is a fielded critic generated in COPE with over 1 ,500 rules, 1 ,500 objects, and 2,000 textual notecards). These

methodologies were designed to improve the speed...

...errors) in typical office documents. This is because the differential analyzers now do the following:

(1) They compare each word in a sentence of the document to a sentence file listing...of critics, called style preprocators (e.g., [20]) the analyze three levels of the document:

(1) at the word level they do syllable counts,
(2) at the sentence level they do...just with the programmer positions, but also with the entire team of project managers, requirement analysts, designers, maintainers, and so on. Each has a Computer Aided Software Engineering (CASE) environment in...fact that such parallels make it relatively straightforward, at least conceptually, to do two things.

(1) Merge the two types of programs into high function environments. An example of an attempt...attempts to criticize the expert system's effort as shown in Figure 4.e by:

(1) noting its failure to reach a conclusion,
(2) commenting on the rules that were used...tutoring systems field seem worth exploring for their utility to critic programs (see Figure 5).

(1) "overlay models" that might help identify what critiquing strategy will work based on the errors a...
...critics. We will now explore each of these three ideas.

Next Generation Differential Analyzers: The Overlay Model. The differential analyzer, universal to critic programs, was first conceived under the name of...

...has now become the standard in the intelligent tutoring field. It is based on the overlay theory of [4], which presumes that a student will make different moves at different skill...

...skill level and conveys this to the differential analyzer that determines which of the skill-overlays to utilize.

There are numerous concerns and challenges associated ...such an approach for critics. For example, more must be known about the users, the overlays must be fleshed out, a user model must be added, and some of the overlay theory is unfinished. The advantages, however, could be potentially substantial. Criticism would be more oriented...

...level of depth of knowledge). These are just a few of the advantages of using overlay theory.

The Role of the User Model. In the survey of critics, the user model was included in the architecture of critic programs (Figure 1), but no critics were cited in the section on the five categories that actually used ...

...Correcting technical writers of this class of deeply ingrained errors probably requires use of an overlay theory that offers multiple strategies of criticism. Yet, the critic's correction used a single explaining strategy only. In the absence of an overlay, the critic never recovered the situation when the author became confused. It never even knew ...a Critic. The architecture of many critics is a major focus of this survey. Figure 1 and Table 1 illustrate the major modules of a critic's architecture. These include differential analyzer, expertise module, dialogue generator, text files, user model, and interface. Table 1 also shows how differently various critics implement the capabilities and sub-components of these modules...

...their particular needs. The discussion of this survey should help them make those decisions.
